

# ALLUXITY

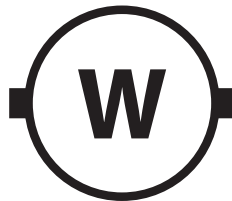

## Power One

### Inputs

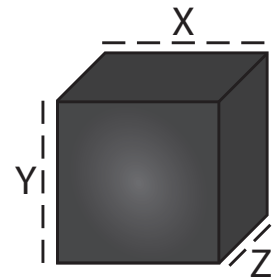

1 Balanced (XLR)  
1 Unbalanced (RCA)

### Power Rating

200W 8ohm RMS  
≈400W 4ohm RMS  
≈800 2ohm RMS

### Dimensions

43.5 x 10.5 x 48 cm  
17.1 x 4.1 x 18.9 inch  
31kg / 83 pounds

The Power One is built upon the same technology as the Pre One with fully discrete balanced modules tweaked to fit into a power amplifier. It uses zero global feedback and is assembled with building blocks that make future upgrades or replacements affordable and easy to do. The chassis is milled out of one piece of aluminum and finished up with powder coat paint.

Each powerstage have it's own seperate power supply and 600VA transformer.

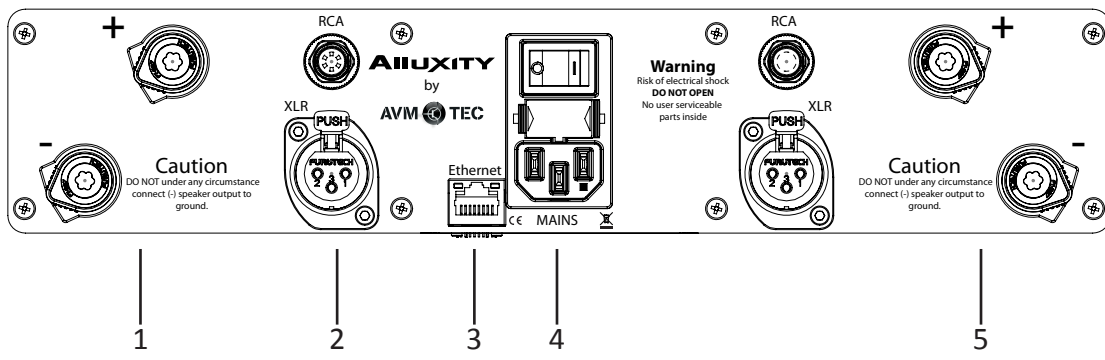

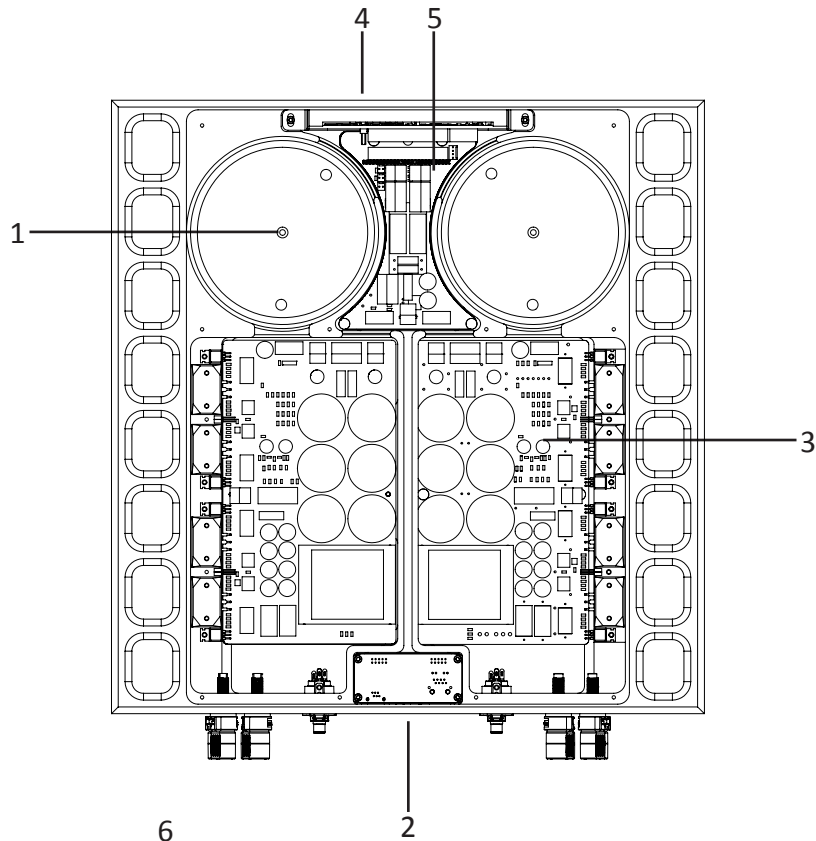

There are 2 different inputs to choose from. 1 Balanced (XLR) and 1 Unbalanced (RCA).

The Power rating is 200W in 8ohm RMS that nearly doubles into 4ohm and 2ohm.
